

A commercial airplane is shown from a low angle, flying over a vast expanse of white and grey clouds. The sky is a mix of deep blue and warm orange and yellow hues, suggesting a sunset or sunrise. The airplane's wings, engines, and tail are clearly visible.

# Airline Satisfaction

Inference Modeling for Overall Customer Satisfaction

Edgar Gonzalez

Lera Tsayukova

# The Dataset:

-23 feature columns

-1 binary target column

---

Source

Kaggle

Airline

Observations

106,000

Features

Original =24

After Engineering= 38

## Our Business Problem:

-To understand which features have the **greatest impact** on overall customer satisfaction

-**Inferential** :  
Understand relationship between X & Y

## Who Would Care?

BOARD  
MEMBERS

STAKEHOLDERS

OTHER  
AIRLINES

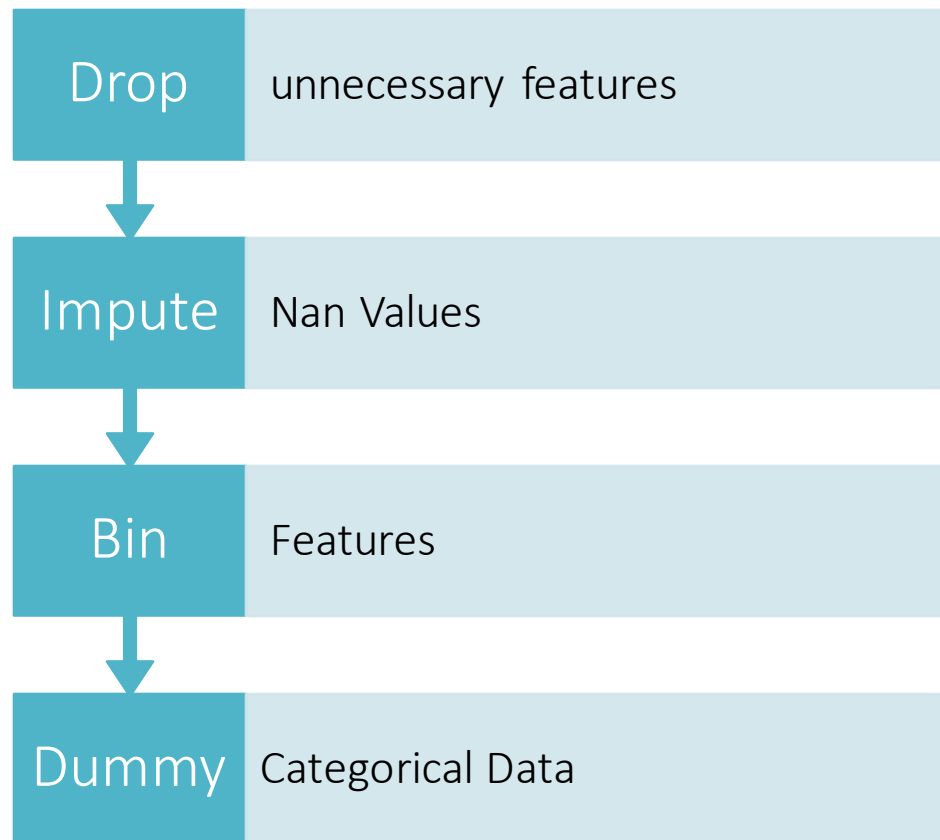

Our Target Variable:

Satisfaction

- Satisfied= 1
- Dissatisfied= 0

44% Satisfied

56% Dissatisfied/Neutral

# EDA Process

---

## Our Models:

---

- Logistic Regression
- 
- Decision Tree
- 
- Random Forest Classifier
- 
- Grid Search RFC

## The Modeling Process:

- App. 300 Models Run
- Evaluation Metric -> Accuracy

Dummy Model Classifier

# Baseline Model:

- Predicts majority class (Dissatisfied) every time.
- Predicts with mean accuracy of 56%.
- Same odds as flipping a coin.

# Comparing the Models

	Model	Train	Test
0	Dummy Model	0.567216	0.565022
1	Logistic Regression	0.876899	0.876732
2	Decision Tree	1.000000	0.943371
3	Grid Search Random Forest	1.000000	0.962658

# Our Best Model: Random Forest Classifier

```
'Online boarding': 0.297,  
'Inflight wifi service': 0.157,  
'x3_Business': 0.103,  
'x2_Business travel': 0.07,  
'x2_Personal Travel': 0.066,  
'Inflight entertainment': 0.058,  
'x3_Eco': 0.053,  
'Seat comfort': 0.028,  
'Ease of Online booking': 0.027,  
'x1_Loyal Customer': 0.027,  
'x1_disloyal Customer': 0.021,
```

## Feature Importance :

Which features factored the most into customer experience and overall satisfaction Levels

## Examining Online Boarding:

- Rating from 1-5
- Large increase in overall satisfaction between 3 and 4

Feature  
Importance:

Amenities

Inflight Wifi

Inflight  
Entertainment

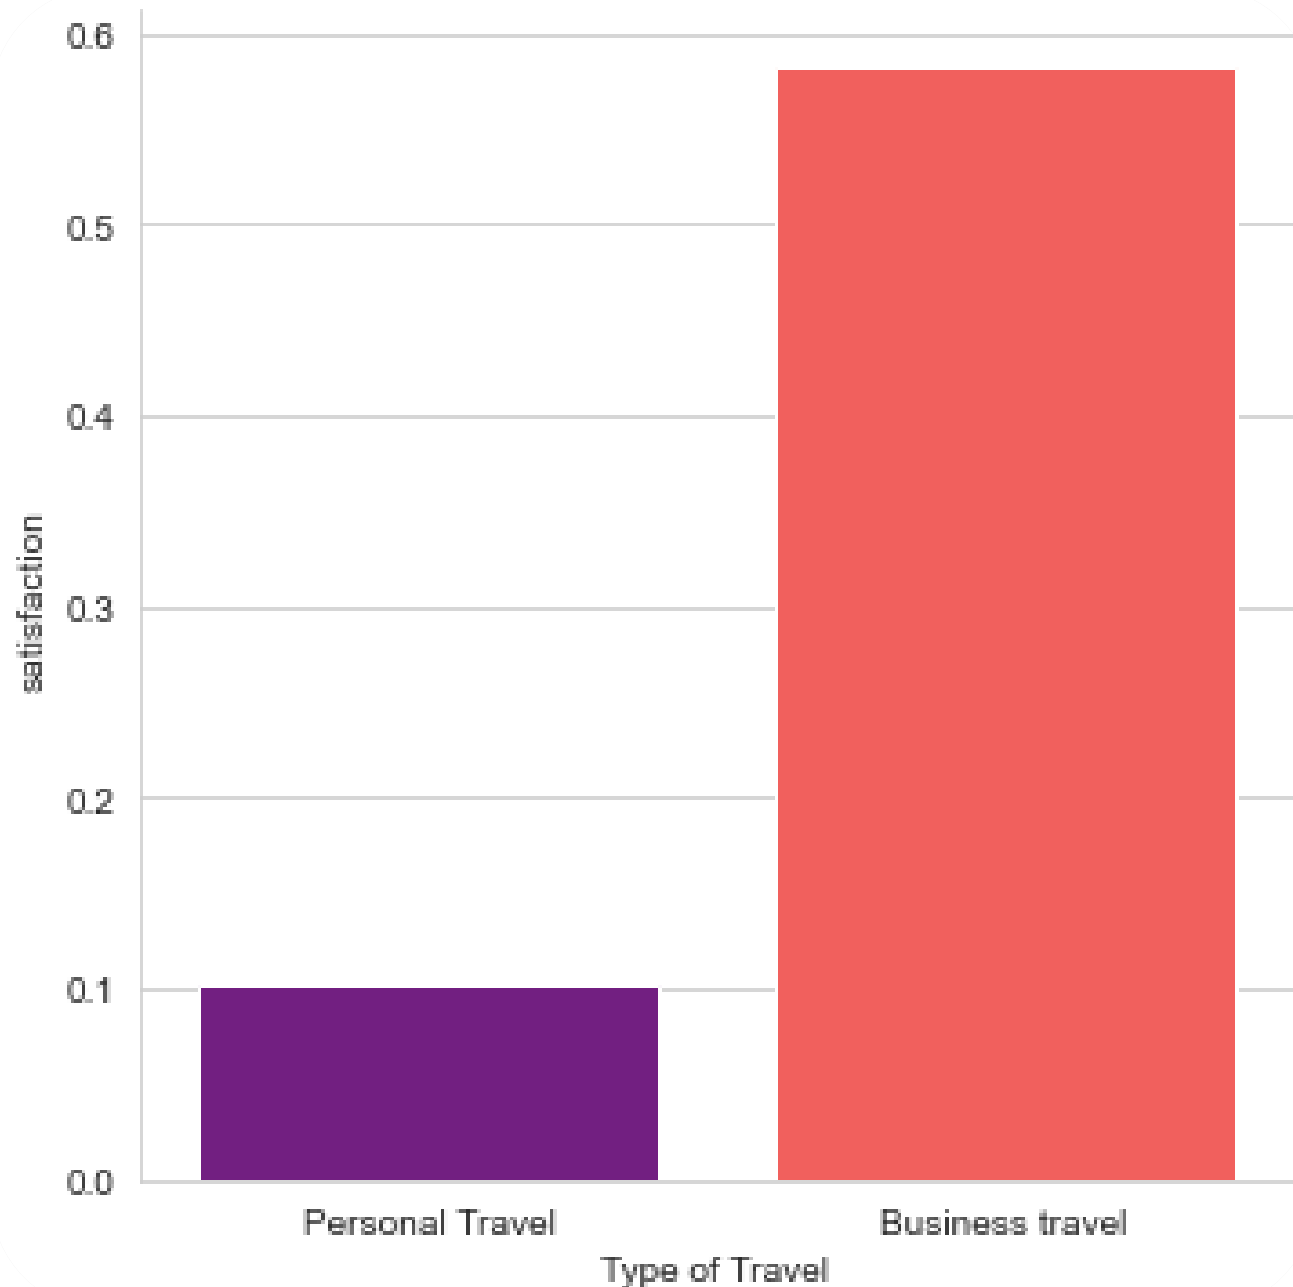

# Feature Importance:

Business Class: 70%

Economy Plus: 25%

Economy: <20%

## Type of Travel: Business or Pleasure

-60% of **Business**  
Travelers  
Satisfied

10% of **Leisure**  
Travelers  
Satisfied

## Conclusions/Recommendations

- ## -Focus on Online Booking

- Strive to provide/ boost Inflight Wifi

- Improve availability of Inflight Entertainment

- Provide more Perks for customers to fly Business Class
